Training Approaches

TAC Curriculum focuses on clinical practice of therapists working with adoptive families experiencing public, private, kinship and inter-country adoption.

Approach: Advanced presentations on critical adoption issues, emphasizing clinical implications and current evidence-based/-informed clinical practices. Opportunities for discussions with transfer-of-learning to practice examples and practical applications for clinical case consultations.

NTI Mental Health Curriculum focuses on clinical practice with emphasis on work with children and youth in foster, adoptive, and guardianship families.

Approach: Foundational content based on most current research and practice knowledge. Includes tools and practical strategies that promote healing, healthy development, permanency, family stability and emotional well-being.

Benefits and Features

- Gain an in-depth understanding of core adoption issues, current clinical tools and evidence-based approaches.
- Be an asset for risk management by bringing quality, evidence-based clinical practices to the work of your agency.
- Receive practical ideas and resources to use in your work. Expand your network of mental health professionals from the class and enjoy collaborating.

- Gain a shared language with understanding for improved collaboration between mental health and child welfare service systems.
- Be interactive and engaged – real life scenarios, case vignettes and videos of actual lived experience and experts.
- Select from many free resources in each module to download and use in your work.
